

An integrated and seamless trial experience

Building on a legacy in healthcare data and technology, Flatiron's clinical research team is using our unrivaled knowledge on where and how to untangle complex, outdated processes to solve your clinical trial pain points.

Our portfolio of products works together to reduce burden on site teams and improve your day-to-day operations so you can focus on your work and deliver positive patient outcomes.

266+ sites

Over 266 sites currently use our technology, with more to come this year

100+ trials

Over 100 clinical trials supported by Flatiron products

50+ sponsors

More than 50 sponsors running clinical trials with Flatiron

OUR PRODUCT PORTFOLIO

flatiron CLINICAL PIPE™

Flatiron Clinical Pipe™ is an EHR-to-EDC connector that easily transfers relevant study data between systems, reduces data monitoring queries, and eliminates frustrating manual data entry.

flatiron VESSEL™

Flatiron Vessel™ is a powerful electronic data capture (EDC) system that provides unmatched speed, interoperability, and reliability to make your study data entry process simpler.

ONCOTRIALS®

Powered by EHR data, OncoTrials® enables your team to easily identify, screen, recruit and track patients for trials. Once an eligible patient is identified in OncoTrials®, your team is notified directly in the EHR, meaning no more missed opportunities.

"For us, this is the first technology solution we've been presented with that really takes everything off the site."

Kailee Hawkins

Clinical Research Supervisor, Alabama Oncology

Benefits of working with Flatiron

Fewer redundant, time-consuming tasks

Through comprehensive user research, we've designed workflows within our products that solve site pain points and provide ongoing site support and training to ensure that all staff know how to effectively use Flatiron technology.

A more connected technology ecosystem

Each of our clinical research products connect with each other and with other systems you commonly use, creating a more seamless and interoperable experience across your clinical trial activities.

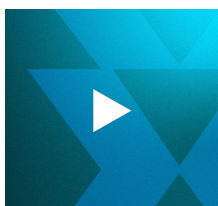

Deep clinical research expertise

We intimately understand team needs across a clinical trial and have great empathy for site challenges because we employ industry professionals across functions and disciplines like clinical oncologists, site research coordinators, healthcare providers and regulatory professionals.

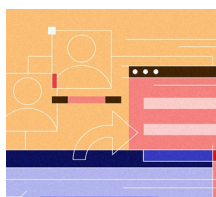

Reliable functionality and speed

We've created an intuitive system of connected products with back-end functionality designed for stability and speed. Complete your varied and extensive study requirements like data entry, maintenance of data quality, management of amendments with less effort, on a faster timeline and with greater confidence.
